

Glasswasher - Mora 50

Reference: 10.105.000

7,969.50€ tax excluded

Product short description:

Built-in dishwasher, usable for washing glasses and dishes.

Complete double wall, no visible screws, damped door closure.

No washing and rinsing agents required.

Neutralizes bacteria, inactivates viruses.

Thanks to its properties, ozone eliminates more than 99% of bacteria, molds, fungi, yeasts, pollens and mites, and also inactivates viruses. Its function is to eliminate the microbial load present in the air, in water and on surfaces.

Eliminates bad smells

Eliminates the unpleasant odors of tobacco, food, perspiration, rot, mold. The ozone molecules attack and neutralize the particles causing the bad smells, leaving in their place a pleasant sensation of cleanliness and regenerated air.

Natural

Ozone is a naturally occurring gas composed of three oxygen atoms (O^3). It is formed in the stratosphere by the action of UV rays and electric discharges from lightning. As it is an unstable gas, it converts back to oxygen in a short time and that is why it is not polluting.

ecological

It disinfects perfectly without the need of chemical additives, using its natural oxidizing force. Once the treatment is finished, the ozone reconverts into oxygen without leaving any toxic or chemical residues.

Product features:

Length: 60 cm
Depth: 64 cm
Height: 82,5 cm
Electric power: 230 W
